

## List of Students

*Jeremy Jacobson*

*Java, some AWS, web development, C#*

***Tyler Hall***

***'m pretty decent at Java, average at web coding but don't really have much of a creative eye. Good at SQL but don't have a ton of experience with databases, only stuff I've done in class. Not very familiar with programming for android. Good at project management stuff, organizing, etc. Email for github is [tylerh1701@live.com](mailto:tylerh1701@live.com)***

*Daniel Ortega*

*I don't really have real world experience, almost all i know was learned at school. i have taken java classes, html, javascript, sql and linux. on the side, i have been playing with android studio, but i have never published anything, i just wanted to know how it works.*

*Melissa Clark*

*My bio is very exactly to Daniels. Up till Linux. I know nothing about Linux and everything after that is not me. Also I've been distracted by family so I'm sorry. I got in my computer this morning to start git. But i can't seem to get passed the page where i enter my pin. It's just a blue screen but the cursor is there. Ant suggestions? I've restarted it multiple times.*

*Alex Brewster*

*I am currently in CSIS1410, object oriented programming, so I have 1 semester of java programming under my belt. I have also taken an HTML class and php class, so I have some experience with HTML, CSS, Javascript, and php. I also have done a little with mysql and aws, but not much.*

*Professionally I am a helpdesk/supervisor at a broker/dealer, so I don't do any programming here.*

*my github email is:*

*[al.j.brewster@gmail.com](mailto:al.j.brewster@gmail.com)*

***John Perry***

***Programming knowledge includes:***

***Javascript, Java, Python, Swift, C++***

***Experience with web:***

***I've created a bunch of websites, and specifically have experience with Wordpress, Jekyll, and React. I have fairly extensive knowledge of HTML and CSS as well.***

***Experience with mobile and databases:***

***I've built apps in Swift for iOS devices and I've worked with building, adding to, and querying databases***

***80126026260***
